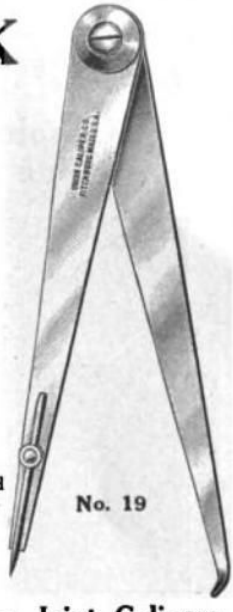
UNION ADJUSTABLE

A handy, quick Adjustable Wrench for taps, drills, reamers, and tools of a like nature. Two sizes.

TAP WRENCH

This wrench is provided with a countersunk center for use in a lathe. Made of tool steel properly tempered



No. 19

Union Spring Calipers have many points of superiority Springs are so constructed they fit the hand, prevent side deflection in legs of tool, and of ample strength to retain position in which tool is set.

Nuts are hardened and run smoothly.

Screws have flat top threads, great strength and wearing qualities. Prevent collection of dust.

Caliper Points correct shape and size especially tempered for wearing qualities.

Union Firm Joint Calipers

have many superior features, including new adjustable triple friction joint, easily adjusted with common screw driver to any desired tension.

Contact Points are sufficiently hard to make them very sensitive to the touch when calipering.

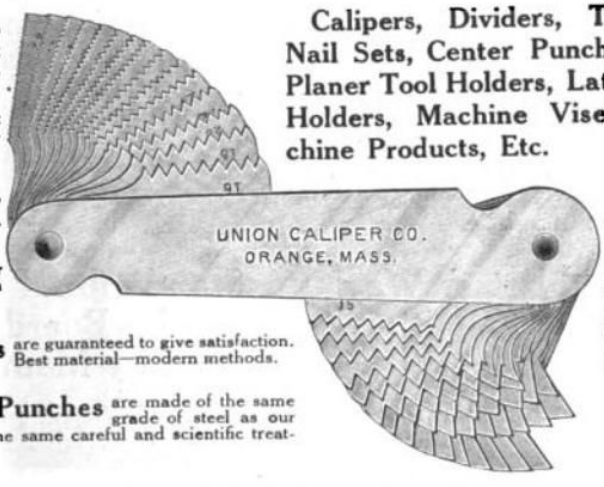
Our policy is to furnish strictly first class tools at lowest prices,

consistent with best material and workmanship.

We warrant every tool of our manufacture

to give satisfaction for the purpose for which it is intended.

Calipers, Dividers, **Tap Wrenches, Nail Sets, Center Punches, Lathe and Planer Tool Holders, Lathe Dogs, Drill Holders, Machine Vises, Screw Machine Products, Etc.**



Union Thread Gauge No. 50

This gauge has all the pitches in common use from 4 to 42. The teeth are sharp and accurately cut. V thread.

Union Nail Sets are guaranteed to give satisfaction. Best material—modern methods.

Union Center Punches are made of the same grade of steel as our nail sets, and receive the same careful and scientific treatment.
